SUMMARY

Software Engineering undergraduate with hands-on experience in frontend and full-stack MERN development, specializing in React, Node.js, RESTful API integration, and scalable web applications. Strong foundation in software development, debugging, version control, and Agile collaboration, seeking a Software Engineer Internship to contribute to production-ready systems.

SKILLS SUMMARY

- Programming Languages: JavaScript, TypeScript, Python, Java
- Backend Development: Node.js, Express.js, RESTful APIs
- Frontend Development & UI/UX: React, Vite, Tailwind CSS, HTML, CSS, Figma
- Databases: MongoDB, MySQL
- Authentication & Security: JWT, Bcrypt.js
- Tools & Platforms: Git, GitHub, Visual Studio Code, Postman
- Collaboration & Workflow: Trello, Agile Basics, Team Collaboration

PROJECTS

AI-Powered eBook Creator (Production) | Frontend Contributor

Tech Stack: React, Vite, TypeScript, Tailwind CSS

GITHUB | LIVE

Jan 2026 - Jan 2026

- Designed and built a component-based React architecture to structure reusable UI elements, improving maintainability, scalability, and overall consistency across the entire application.
- Added eBook cover image uploads with client-side validation and previews increasing successful uploads.
- Integrated React frontend components with backend REST APIs to render AI-generated content in real time, supporting 15+ UI components.
- Accelerated frontend performance using Vite bundling reducing overall page load times and improving user experience.
- Deployed the full-stack application on Render, delivering a fully production-ready system accessible via a secure live endpoint.

Netflix Clone Web Application | Frontend Developer

Tech Stack: React, Vite, CSS

GITHUB

Dec 2025 - Dec 2025

- Integrated TMDB REST API to fetch and display movies and TV shows, including posters, ratings, genres, and release dates.
- Developed real-time search, category filtering, and trending sections using React, enabling users to browse content in real time.
- Engineered a responsive React + Vite frontend optimized for all devices, improving user engagement and accessibility.
- Managed API data fetching and state handling using React hooks, supporting movies and TV shows with real-time UI updates across 8+ components.
- Enhanced API calls and component reusability improving overall application performance.

Airport Restaurant Reservation & Pre-Order System | Full-Stack & Developer

Tech Stack: MERN (MongoDB, Express.js, React, Node.js), TypeScript

GITHUB

Apr 2025 - May 2025

- Architected a full-stack web application for airport restaurant reservations and food pre-ordering.
- Implemented RESTful APIs with Node.js and Express.js and built MongoDB schemas for managing bookings and orders efficiently.
- Created a responsive React + TypeScript frontend with 10+ reusable components, supporting real-time availability updates and consistent rendering across devices.
- Integrated frontend and backend services using REST APIs and implemented Git/GitHub version control for collaborative development.
- Optimized application performance and scalability through efficient state management, API handling, and modular component architecture.

EDUCATION

BSc (Hons) in Information Technology - Software Engineering

Sri Lanka Institute of Information Technology (SLIIT)

GPA - 3.74

May 2023 - May 2027 (Expected)

GCE Advanced Level Examination 2021/2022

Stream - Engineering Technology

Devi Balika Vidyalaya, Colombo 08

CERTIFICATIONS

JavaScript Essentials 1 | CERTIFICATION

Cisco Networking Academy, Dec 2025

React (Basics) | CERTIFICATION

HackerRank, Dec 2025

Web Design for Beginners | CERTIFICATION (Verification Code - XrTnihug80)

Centre for Open and Distance Learning (CODL), University of Moratuwa, Dec 2025
